Slovakia

PRESENTATION

Energy recovery of waste and its potential and use in Slovakia.

Energetické zhodnocovanie odpadov a jeho potenciál a využitie na Slovensku.

ANNOTATION

Europe starts to support energy recovery from waste in significant scale. Slovakia as a member state of the EU has to join this initiative in the area of legislation as well as in technical area. In coming 5 years we will face new challenges in waste management. Are we ready for them?

ANOTÁCIA

Európa začína vo výraznej miere podporovať energetické zhodnocovanie odpadov. Slovensko ako člen EÚ sa k danej iniciatíve musí pričleniť a to legislatívne ako aj technicky. V horizonte 5 rokov na nás čakajú nové výzvy v nakladaní s odpadmi. Sme na ne pripravení?
